**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,8,9,15, are rejected under 35 U.S.C. 102(b) as being anticipated by USP 5,815,883 (Stein et al.).

Claims 1-7,15,16 are considered to be drafted as combination claims, combining a hose connection assembly disposed between a dust-collecting chamber of a cleaner body and a connection part of a suction brush.

Figure 1a shows a hose connection assembly comprising a flexible hose (4") that on one end is connected to a dust collection chamber and the other end (2") connected to a suction brush, a hose holder (10") that on one end is connected to the hose (4") and on the other end (2") is removably connected to a suction brush, a handle (5") mounted on the hose holder (10"). The assembly further includes a mounting portion having a bead (9") formed on the outer circumference of the hose holder (10") which is rotatable allowing rotation of the handle (5"). See column 4, lines 56-63, disclosing the rotating knuckle (9") which would allow rotation of the handle.

***Allowable Subject Matter***

Claims 3-7,10-14,16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The other USP references cited are considered to be generally related to the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A. Redding whose telephone number is 571-272-1276. The examiner can normally be reached on Mon.-Fri. 6:00 - 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gladys Corcoran-Piazza can be reached on 571-272-1224. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
